

Santiago Montaña

Data Scientist & AI Solutions Builder | Electronic Engineer

santiloc23456@gmail.com +57-3105508171 <https://www.linkedin.com/in/santiago-montaña/>

SUMMARY

Data Scientist with a background in Electronic Engineering and a specialization in Strategic Data Analytics. Experienced in data pipeline engineering (dbt, Meltano, Airflow), cloud data warehousing (Snowflake), machine learning, conversational AI, and building AI-powered solutions with Python, SQL, and modern LLMs including Claude. Passionate about automating processes and communicating data-driven insights.

EXPERIENCE

Junior Data Scientist

Jan 2026 – Present

CIM DATA IA, Boyacá

- Developed conversational AI models integrating MCPs for advanced interactions.
- Built an autonomous agent to automate enterprise infrastructure deployment.
- Engineered data pipelines using AWS, Snowflake, and Apache Airflow.

Development Assistant

May 2025 – Dec 2025

CIM DATA IA, Boyacá

- Correction and improvement of banking chatbots, optimizing response accuracy and client interaction.
- Collaboration on an AI voice assistant for automated loan verification using Python, ElevenLabs, and third-party APIs.
- Implementation of process automations and operational data analysis to drive technological efficiency.

Intern

May 2024 – Nov 2024

HOLCIM S.A., Nobsa, Boyacá

- Automated operational data collection and processing using Google Apps Script and Python.
- Designed and implemented a central database to improve asset traceability and organization.
- Created interactive dashboards in Looker Studio for KPI tracking and equipment performance analysis.

SKILLS

Data Engineering & Orchestration:	Snowflake, dbt (SQL transformations), Meltano (ELT extraction), Apache Airflow (DAG orchestration), ETL/ELT pipelines, Data modeling
Machine Learning & AI:	Scikit-learn, TensorFlow, Prompt Engineering, Claude AI (context & code assistance), LLM integration, Predictive modeling
Conversational AI & Chatbots:	Chatbot development & optimization, ElevenLabs (Voice AI), NLP, Conversational UX design
Programming Languages:	Python (NumPy, pandas, Matplotlib, Scikit-learn, TensorFlow), SQL, JavaScript / TypeScript (ES6+), C++
Cloud & DevOps:	AWS (EC2, S3, IAM), Git & GitHub, GitHub Actions
Databases:	Snowflake, PostgreSQL, MySQL, SQLite
Visualization & BI:	Power BI, Tableau, Looker Studio

PROJECTS

Technical Support Dashboard

Tools: Google Sheets, Looker Studio, Python

Integration of Google Forms data with Google Sheets and interactive dashboards in Looker Studio for the support area.

POS System for Personal Business

Tools: Python, SQLite, Google Sheets, Kivy, GitHub

Point-of-sale system for sales management and near-real-time inventory flow tracking.

Car Model Classification & Deployment

Tools: scikit-learn, pandas, Flask, Streamlit, GitHub

End-to-end vehicle classification model deployed as a web application, automating the pipeline from preprocessing to production.

Bitcoin Predictive Analysis
Predictive model based on news sentiment analysis and Monte Carlo simulations to estimate market behavior and support investment decisions.

Tools: Python, Scikit-learn, Monte Carlo, Jupyter Notebook

EDUCATION	LANGUAGES
Specialization in Strategic Data Analytics <i>Universidad Pedagógica y Tecnológica de Colombia (UPTC)</i>	Spanish — C2 English — B1
Electronic Engineering <i>Universidad Pedagógica y Tecnológica de Colombia (UPTC)</i>	

COURSES & CERTIFICATIONS			
Data Scientist con Python	Apr 2025	Introducción a Machine Learning	Jan 2025
Regresión Lineal con Python y scikit-learn	Feb 2025	Decision Trees y Random Forest	Mar 2025
Crear tus Proyectos de Ciencia de Datos	Feb 2025	Tableau	Mar 2025
Power BI		Estadística Descriptiva para Data Science	Dec 2024
Cálculo Diferencial para Data Science	Jan 2025	Python	Sep 2024
Git y GitHub	Jan 2025	Jupyter Notebooks y Anaconda	Nov 2024
Bases de Datos con SQL	Sep 2024
